

## SOLUTION DESIGN

### Hardware Requirements:

- ✓ 1 to ∞ unit PC (Personal Computer)
- ✓ 1 unit Server

### Software License:

- ✓ 1 license for the Server

### Solution Description:

- ✓ SERVER – Setup with Linux Operating System and configured as web-server for maximum performance. All the transactions are processed and the data are kept in this server.
- ✓ CLIENT – Setup as normal office computer whether Linux, Macintosh or Windows. Browsers are use to connect in the server. No other software installation needed.
